

**The NOW Classrooms Series**

**BOOK STUDY**

*with Solution Tree*

**by Meg Ormiston**

## **CHAPTER ONE**    **Embracing Creativity**

Creativity is critical for our students as they demonstrate what they have learned using all different tools and media. This session will focus on students creating projects with digital images, video projects, and audio.

## **CHAPTER TWO**    **Communicating and Collaborating**

In this session, we will be discussing how groups of students can collaborate as they create instructional videos to connect with a variety of audiences, along with giving and receiving quality feedback.

## **CHAPTER THREE**    **Conducting Research and Curating Information**

In this book study session, we will explore a variety of digital tools students and teachers can use as they gather information through online research. In addition to gathering information, we will discuss strategies for evaluating the quality and the sources of the information.

## **CHAPTER FOUR**    **Thinking Critically to Solve Problems**

In this session, we will discuss how to structure projects for student voice and choice of digital tools and how students can manage their workflow. In addition, we will look at data-driven solutions using technology.

## **CHAPTER FIVE**    **Being Responsible Digital Citizens**

Ensuring internet safety is the focus of this session, including specific ways to help students understand the importance of managing their digital footprint. We will also discuss legal and ethical behaviors while working online.

## **CHAPTER SIX**    **Expanding Technology and Coding Concepts**

This final session in the series will tie everything together, including storing, sharing, and managing online files, along with introducing coding to students. In addition, we will discuss the four C's of communication, collaboration, creativity, and critical thinking for future success.
