Figure 5.5: Fifth-Grade Self-Evaluation Chart for Mathematics Learning Goals

Check the box that most accurately represents your current level of achievement:

10 = I have mastered this goal

- 9 = I still need a little help from the teacher, but I can do this mostly on my own
- 8 = I made good progress toward this goal last year
- 7 = I can do this with teacher feedback and support
- ? = I have not been introduced to this goal

Mathematics goal	10	9	8	7	?
Use mathematics to solve real-world problems.					
Work in a group to solve challenging problems.					
Use a variety of estimation strategies.					
Round whole numbers and decimals.					
Add, subtract, multiply, and divide with decimals and whole numbers.					
Add, subtract, multiply, and divide with fractions.					
Solve an equation with one variable.					
Collect information from graphs and tables.					
Measure angles with a protractor.					
Make accurate measurements using a ruler, scale, and thermometer.					
Use data to predict outcomes.
